

## Proof reading **HELP!**

Have your press releases, letters etc. read out loud to you.

Visit [www.readplease.com](http://www.readplease.com) and download the **FREE** text-to-voice software. Use it to proof read your press releases, letters emails etc.

The American voice file comes as standard so you will need to download the British voice files (male & female) which again are **FREE**.

They have other voice files such as French, Dutch, Italian, Portuguese or even Spanish! So why not get a head start on that French and German homework or even start learning the holiday lingo!

Don't forget this is all **FREE** so go for it!
